INTRODUCTION

1. 2-pin case SMD semicondutor components
2. SOD-80 (MELF) case SMD semicondutor components
3. 3-pin case SMD semicondutor components
4. SOT-223 case SMD semicondutor components
5. SOT-89 case SMD semicondutor components
6. 4-pin case SMD semicondutor components
7. 5-pin case SMD semicondutor components
8. SOT-89-5 case SMD semicondutor components
9. 6 and more pin case SMD semicondutor components
10. BGA, DFN and QFN case SMD semicondutor components
11. D-PAK and I-PAK case SMD semicondutor components
12. Case pin assignment
13. Pinout (table)
14. SMD-code marking attribute
15. SMD-code marking style
16. Sample schematic diagram
17. Adittional SMD info
18. Case drawings
19. Manufacturers logos and URL

Toronto, 2014 edition
Chisinau, 2014 edition

Introduction

At earlier eighties began a trend to replace a traditional through - hole technique with the surface mounted technology (SMT) using surface mounted devices (SMD). The SMT, although intended in principle for automatic manufacturing only expand more and more, even into a hobby world. This trend will continue, because many new components are available in SMD versions only. The SMT technique opens advantages and new applications through miniaturising of the components and increasing of reliability. The industry standard unfortunately allows that most of the SMD components does not have a clear description. Since a tiny size of the components, they are labelled with one, two or more character or graphic SMD code. Thus it is necessary to take into account that the colour and (or) placing of alphanumeric or graphic symbols are also important. Therefore a sure identification of the components is impossible without appropriate technical documentation. Moreover the polarity and pin - outs of different components could be not identified without data sheets.

Identifying the manufacturers type number of an SMD device from the package code can be a difficult task. Unfortunately, each device code is not necessarily unique.

It is possible for various manufacturers to place different devices in the same case with the same SMD-code. For example, with a **6H** SMD-code in a SOT-23 case might be either a npn-transistor **BC818** (CDIL) or a capacitance-diode **FMMV2104** (Zetex) or a n-channel jFET transistor **MMBF5486** (Motorola) or a pnp-digital transistor **MUN2131** (Motorola) or a pnp-digital transistor **UN2117** (Panasonic) or a CMOS-integrated circuit- voltage detector with reset output **R3131N36EA** (Ricoh). Even the same manufacturer may use the same code for different devices.

To identify a particular SMD device, is necessary to identify the manufacturer, package type and note the SMD code printed on the device.

The identification of the manufacturer is possible only if on the case are printed the manufacturer's logos, but it not always happens. Besides, sometimes, it is possible to determine the manufacturer with indirect tags. Many recent ON Semiconductor devices have a small superscript letter after the device code, such as **SA**^{c} (this smaller letter is merely a month of manufacture code). Infineon devices usually have a lower case **'s'** (ATs, LOs). NXP (Philips) devices usually have a lower case **'p'** (AHp, Z1p, pB0) or **'-'** (DQ-, -ZS) for the devices made in Hong Kong, **'t'** (tT9, Y7t) for the devices made in Malaysia, "W" (WT9, Y7W) for the devices made in China. In section 19 are submitted the logos of the SMD devices manufacturers.

The package type is another problem for the identification of SMD devices. The different manufacturers can designate identical cases concerning by the various standards (or concerning by the internal system). Besides, the various cases can have an identical kind (form) and differ only by sizes. This distinction of sizes so it is not enough, that can be is measured only by special measuring devices.

Compliance with the name and type of cases from different manufacturers is solved by applying in the column "Case" an equivalent type name for equivalent cases.

In addition to SMD-code, uper case may be put padding alpha-numeric information (usually by another font or size of characters, also may be by other arrangement). Relationship position of the SMD-code and padding information have defined as style and show in the column "Style"

In the following tables sections the SMD semiconductor components - irrelevant as to whether it is dealing with transistors, diodes, integrated circuits etc. are placed in separate tables according to numbers of terminals and (or) type of cases and are listed in alpha-numeric order by SMD-codes.

Column 1 ("SMD-Code")

Column 2 ("A")
Additional SMD-codes attribute such as subscipt bar, uperscipt bar, reverse symbol and other (section 14).

Column 2 ("Type")
The type designations correspond to those of the respective manufacturer documentations.

Column 3 ("Function")
Short definition of the semiconductor component.
Used abbreviations:

BM-IC	Battery Management integrated circuit
BR	Bridge Rectifier
C-diode	Capacitance diode (varactor, varicap)
CMOS-Log	CMOS logic integrated circuit
Comp-IC	Voltage comparator integrated circuit
DC/DC-IC	DC/DC voltage converter integrated circuit
ESDP-diode	ElectroStatic Discharge Protection diode
ESD-Prot	ElectroStatic Discharge Protection thyristor
-FET	Field Effect Transistor
HEMT	High electron mobility transistors
H-IC	Hall-effect sensor integrated circuit
IGBT	Insulated Gate Bipolar Transistor
IGBT+Di	Insulated Gate Bipolar Transistor with antiparallel diode
LDR-IC	LED driver integrated circuit
Lin-IC	Linear integrated circuit
LVR-IC	Linear voltage regulator integrated circuit
LVR/Vdet-IC	Linear voltage regulator/Voltage detector combined integrated circuit
MMIC	Monolithic Microwave Integrated Circuit
-MOSFET	Metal-Oxide-Semiconductor FET
-MESFET	MEtal-Semiconductor FET
n-	n-channel junction transistor
n/p-	n-channel and p-channel transistors area
Op-IC	Operational amplifier integrated circuit
p-	p-channel junction transistor
PHEMT	Pseudomorphic high electron mobility transistors
PIN-diode	PIN-diode
SA-Z-diode	Surge Absorption Zener diode
Si-diode	Silicon diode
Si-Varistor	Silicon voltage depending resistor
Si-npn	Silicon npn transistor
Si-n/p	Silicon npn and pnp transistors area
Si-npn-Darl	Silicon npn Darlington transistor
Si-npn-Digi	Silicon npn "digital" transistor
Si-npn-Digi+Di	Silicon npn "digital" transistor with inter-

	nal diode
Si-pnp	Silicon pnp transistor
Si-pnp-Darl	Silicon pnp Darlington transistor
Si-pnp-Digi	Silicon pnp "digital" transistor
Si-npn-Digi+Di	Silicon pnp "digital" transistor with internal diode
SiC-diode	Silicon Carbide diode
SiGe-npn	Silicon/Geramanium npn transistor
Si-Stab	Silicon stabistor
SVR-IC	Switching Voltage Regulator integrated circuit
Tdet-IC	Thermal detector integrated circuit
Thy-SCR	Thyristor-controlled rectifier
Thy-SPD	Thyristor-surge protector device
Triac	Triode for alternating current
TVS	Transient voltage supressor
Vdet-IC	Voltage Detector integrated circuit
Vref-IC	Voltage Reference integrated circuit
Z-diode	Zener diode

Column 4 ("Short description")
Short data or description of function of each type.
Used abbreviations:

Adj.	Adjust, adjustable
AF	Audio Frequency
AGC	Automatic Gain Control
ALC	Automatic Level Control
AM	Amplitude Modulation (AM range)
Amp	Amplifier
Ant	Antenna
Att	Attenuator
Aval	Avalanshe
Disc.	Internal CL discharge
BTL	Bridge Tied Loads
Buff	Buffer
CATV	Broad band cable amplifier
+CE	Active HIGH Chip Enable
-CE	Active LOW Chip Enable
Cell	Cellular
CL	Internal CL discharge resistor
Contr	Controlled
Conv	Converter
Cordl	Cordless
Det	Detector
DG	Dual Gate
Diff	Differential
Dr, Drv	Driver
EN	Enable
Ext.	External
FM	Frequency Modulation (FM range)
GaAs	Gallium arsenide
GP	General Purpose Applications
HF	High Frequency
Hi-sp	High-speed
HSST	High-Speed Soft-Start
HV	High Voltage
I2C	I2C interface control
I2S	I2S interface
ICP	Inrush Current Protection
Instrum.	Instrumental
Latch-Pr.	Latch-Protection
LDO	Low drop voltage
LED	Light-emitting diode
LLS	Logic Level Shifter
LN	Low Noise
LogL	Logic Level (Uth > 0,8...2V)
Lo-sat	Low collector-emitter saturation voltage
LSST	Low-Speed Soft-Start
Mix	Mixer
MR	Manual Reset
OCL	Output Current Limiter
ODO	Open Drain Output
OCO	Open Collector Output
OVIn	Over Voltage Rest Input (negative)
OVP	Over Voltage Protection
Osc	Oscillator
Out	Output
OV	Latched OverVoltage function
PA	Power Amplifier
PAD	Pico-Amper Diode
PCA	Pulse Current Amplitude modulation
PDR	Internal pull-down resistor
PFM	Pulse-frequency modulation
Pow	Power
PPO	Push-Pull Output
PSM	Pulse-skip modulation
PUR	Internal pull-up resistor
PWM	Pulse-width modulation
Rect.	Rectifier
Reg.	Regulated
Res.	Resistor
Reset-Pr.	Reset-Protection
RF	Radio Frequency applications
Rt	Reset delay time
SBD	Schottky Barrier Diode
SBR	Schottky Barrier Rectifier Diode
SPI	SPI interface
St-dwn	Step-down
St-up	Step-up
Supress.	Supressor
Sw.	Switching
TMBSR	Trench MOS Barrier Schottky Rectifier
T-MOS	Trench-FET MOSFET
Trd	Time Reset Delay
Tun	Tuner
U-Speed	Ultra-speed
UHF	RF applications (>250 MHz)
ULN	Ultra Low-Noise
UV	Latched UperVoltage function
UVLO	Under voltage lock output
Var	Variable
VCO	Voltage controlled oscillator
VDet	Volatge Detector
Vdi	Input volatge detection
Vdo	Output volatge detection
VHF	RF applications (100...250MHz)
VFM	Voltage-Frequency Modulation
Vid	Video output stages
V-MOS	Vertical Metal Oxide Semiconductor
VR	Voltage Regulator
WB	Wide Band
WD	Watch-Dog Timer

Column 5 ("Case") Manufacturers case designation.

Column 6 ("Pin") Related case pin asignments and pinout (section 12, 13).

Column 7 ("Sch") Sample schematic connection for some ICs. All drawings are placed in the section 16.

Column 8 ("St") "Style" (upercase placement of the SMD-code and additional infomation drawing). All styles are placed in the section 15.

Column 9 ("Mnf")
The names of the manufacturer are abbreviated to save space. The complete name, logos, and URL of each manufacurer is listed alphabetically on section 19.

TURUTA ELECTRONICS WORLD

SEMICONDUCTOR COMPONENTS DATABOOKS, SERVICE MANUALS, DATASHEETS, REPAIR TECHNOLOFIES INFO

Since 2008 TURUTA ELECTRONICS WORLD are the worldwide leading publisher of e-format databooks for semiconductors info like transistors, diodes, thryistors, integrated circuits. Any electronic engineer nowadays is able to work sensibly and rationally with our products as databooks and online database. Anybody missing vital information at the decisive moment is throwing away expensive work time. We will help saving your time, nerves, energy and money. Trust a company being more than 6 years on the market.

Online SMD-codes and leaded components marking database

A monthly updated online database that includes now marking codes for different SMD and leaded, passive and active electronic components like fuses, diodes, thyristors, transistors and integrated circuits.

• **Features:**

- Search by marking code;
- Search by marking code with case class (pin number) selection;
- Exhaustive info about found electronic component;
- Direct link to a electronic component datasheet download;
- Direct link to a manufacturer web page.

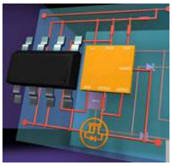
Service manual

Service manuals for fax, printer, copier, mobile and wireless phone, amplifiers, car stereos, cassette decks, Blu-ray/DVD/CD players/recorders, compact stereos, equalizers, receivers, cameras, reel recorders, tuners, and other audio equipment, camcorders, monitors, TVs (including LCD, plasma PDP, projection TVs), and TV/Blu-ray/DVD/CD/VCR combo units. We have more than 80.000 documents in our growing collection!

Service manual pages navigation and searches available for any TEW visitors.

Free service manual download available only for subscribed member of TEW.

Datasheet collection



More than 250.000 datasheets - audio application integrated circuits such as preamplifiers, volume and tone controller, audio processor, audio power amplifiers; power management integrated circuits, industrial application integrated circuits available on your collection.

Electronic format databooks

TURUTA ELECTRONICS WORLD are the worldwide leading publisher of e-format databooks for semiconductors info like transistors, diodes, thryistors, integrated circuits.

• SMD-codes datbook, 2014 Edition

A new 2014 edition SMD-codes databook in electronic format from a known author Eugeniu Turuta presents the SMD-codes for active semiconductor components. This book includes now 235.000 SMD-codes for different semiconductors like diodes, thyristors, transistors and ICs.

• STK and STR integrated circuits, 2014 Edition

Data book about the common and very popular STK (Sanyo) and STR (Sanken) hybrid integrated circuits. Over 2.000 circuits from STK0025 to STR-Z4579.

Connection diagram, application, short description, table of characteristics with all common parameters, replacements, case outline drawings available for all integrated circuits.

• Power audio amplifiers - integrated circuits, 2014 Edition

A new, 2014 edition data book in electronic format from a known author Eugeniu Turuta presents the standard and modified circuit diagram, short description, electrical characteristics, pinouts and conventional case drawings of the integrated circuits - power audio amplifiers.

This book includes about 7000 most popular integrated circuits - power (final) audio amplifiers and for today is the most complete databook in the world.

TEW visitor can download sample (demo) version of all databook.

Purchase of TEW databooks is very simple and can be made directly from web-page trough PayPal payment system. If you don't have access to the PayPal payment system, write to a eturuta@gmail.com.

A new editorial policy of TEW allow to propose already existing customers (any TEW old edition databook buyers and subscribed mebers) the special (discount) price for the news databooks.
